

4.2.2.5 Insulation of Casing Joints

Hiline e-Flex CFC-free polyurethane foam insulation for shell sleeves and heat-shrink-type joints in dimensions HF 25/76 - 160/250. The required quantity of foam is delivered in suitable container sizes for the various joints and T-pieces. The components are supplied separately in two bottles and are only mixed together when needed.

Safety Advice

Please note that safety regulations and installation instructions are supplied with the product. Protective goggles and gloves must be worn during the installation process.

Hiline e-Flex PUR foam insulation Kits

Foam kits are supplied automatically when purchasing shell sleeve and heat-shrink-type joints, however, should additional quantities be required, the part numbers are detailed in the tables below.

Protective goggles

Synthetic gloves
