

## Material

- Main body: pressed brass type CW617, nickel-plated from the outside, on surfaces, which do not have contact with water –  
- full anti-diffusion barrier
- Clamping ring: stainless steel
- O-ring gasket: EPDM

## Area of application

- Installations of hot & cold tap water
- Central heating (radiator connections)
- Surface heating (underfloor and wall heating installations)
- Ice water

## Dimensions

## Overview

The connection between the pipe and the fitting is obtained by pressing the pipe into the fitting's profile. The pressing should be made in the connection area, with a pressing tool equipped with U-type inserts, matched to the type of fitting used. The tightness of the connection chamber is guaranteed by two O-rings, perfectly integrated into the joint area. Pressed connections can be used in the floor groove or a wall furrow.

## Scope of delivery

Main body with sealing and clamping rings
